

Mia Wang

AI Agent Backend Engineer | 5 years backend + 2 years LLM application experience

Email: mia.wang@example.com | GitHub: <https://github.com/example-dev>

Summary

Backend engineer building production AI agent workflows, retrieval pipelines, and runtime observability.

Skills

Python, Java, FastAPI, Spring Boot, LangGraph, LangChain, MCP, Milvus, Redis, PostgreSQL, Docker, Kubernetes, Langfuse.

Experience

2023.03 - Present AI Recruiting Platform Agent Platform Engineer

- Built multi-agent resume evaluation workflow with intent router, parser, JD matcher, technical evaluator, risk evaluator, and report generator.
- Designed agent harness with route plan, tool budget, policy guard, trace replay, and evaluation feedback loop.
- Implemented hybrid RAG with BM25-like lexical retrieval, embedding search, reranking, and fallback visibility.
- Integrated MCP resume evidence server and dynamic skill loading for evidence synthesis.

2020.07 - 2023.02 Cloud Observability Company Backend Engineer

- Developed metrics ingestion APIs, alert routing, and dashboard query optimization.
- Reduced trace query latency by 45% through index redesign and payload compaction.

Projects

Agentic RAG Evidence Pipeline

- Added query planner, retrieval evaluator, reranker, confidence scoring, and Langfuse tracing for every retrieval step.
- Tracked hit count, top score, fallback rate, latency, and answer faithfulness proxy in Grafana.

Education

2015.09 - 2019.06 Zhejiang University B.S. Computer Science
