

QA Automation Engineer Candidate 231
QA Automation Engineer | 9 years experience
Email: candidate231@example.com

Summary

Built UI/API automation suites, flaky test detection, and release quality dashboards. Batch 16, domain scenario 6.

Skills

Python, Selenium, CI, test, quality, REST API, documentation, monitoring, cross-team collaboration.

Experience

2021.01 - Present Northstar Cloud QA Automation Engineer

- Delivered production features related to Built UI/API automation suites, flaky test detection, and release quality dashboards.
- Collaborated with backend, product, QA, and operations teams.
- Improved reliability, observability, and delivery quality with measurable engineering practices.
- Measured outcome: improved error rate 27% through design review, rollout control, dashboards, and incident retrospectives.

2019.07 - 2020.12 Prior Systems Engineer

- Maintained legacy modules, wrote migration plans, reviewed pull requests, and handled production defects.
- Worked with customer success and security teams to resolve escalations.

Project

Domain Platform Improvement 231

- Designed implementation plan, handled rollout, monitored metrics, and produced post-launch review.
- Evidence includes dashboards, logs, pull requests, design docs, and incident notes.

Side Project

Knowledge Base Evaluation 231

- Built retrieval test cases, labeled relevant snippets, compared lexical, embedding, and hybrid search quality.

Education

2016.09 - 2020.06 Example University B.S. Computer Science
