

Yang Jing

Gender: Female Objective: AI Agent Engineer Location: Beijing

Phone: 13962588576 Email: yangjing9768@outlook.com GitHub: <https://github.com/yangjing260>

Education

2010.09 - 2014.06 Nanjing University Data Science and Big Data Technology (B.S.)

Courses: Distributed Systems, Design Patterns, Machine Learning, Compilers, Operating Systems, Data Structures and Algorithms

Summary

Backend engineer building production AI-agent workflows, RAG pipelines and runtime observability, skilled in multi-agent orchestration and tool governance.

Work Experience

2017.07 - Present Ant Group Senior AI Agent Engineer

- Implemented hybrid RAG fusing BM25 lexical recall, vector search, reranking and fallback visibility, raising evidence hit rate by 51%.
- Built an offline evaluation set and automated scoring covering faithfulness, relevance and usability, ensuring online service stability.
- Designed prompt templates with version management supporting gray release and A/B, improving iteration speed by 16%.
- Wired the full LLM call chain into Langfuse, tracking hit count, top score, fallback rate and latency per step.
- Tuned Milvus index and sharding strategy, reducing retrieval latency from 1200ms to 180ms, with experience documented and shared internally.

2014.07 - 2017.06 Xiaohongshu AI Agent Engineer

- Handled 550K agent invocations per day while keeping the online service stable.
- Integrated an MCP resume-evidence service and dynamic skill loading for evidence synthesis and tool governance, reused across multiple business lines.
- Added structured constraints and validation on LLM output to reduce hallucination, raising key-field extraction accuracy above 90%.
- Designed an agent runtime with route plan, tool budget, policy guardrails, trace replay and an evaluation feedback loop.

Projects

ResumAI Agent - Intelligent Resume Evaluation Platform (Spring Boot + Vue3 + Milvus + Neo4j + DeepSeek)

- Implemented RAG evidence retrieval with citation tracing for explainable conclusions, and it became a reusable team best practice.
- Integrated Prometheus and Grafana for full-link observability.
- Built a Neo4j knowledge graph linking job skills and candidate abilities.
- Orchestrated a multi-agent evaluation flow with a DAG covering parsing, matching, evaluation and report generation.

Enterprise Knowledge Base QA (LangChain + Milvus + Redis)

- Built online evaluation and a feedback loop, recognized by stakeholders and peers.
- Supported multi-turn conversation memory and context management.
- Added reranking and citation tracing to reduce off-topic answers.
- Implemented document chunking and multi-route recall to improve long-document QA.

Customer Service Agent (FastAPI + LangGraph)

- Implemented intent recognition and slot filling to raise resolution rate.
- Designed human fallback and escalation for better experience, and it became a reusable team best practice.
- Designed tool orchestration and function calling to connect business systems.
- Improved user satisfaction by 51%.

Highlights

- Owned core modules that steadily served 550K daily visits with 99.9%+ availability
- Built a reusable methodology and docs around LangGraph/LangChain agent orchestration, adopted by several teams
- Established metrics and reviews around computer networking basics to keep improving delivery quality
- Led a major technical effort involving requirement analysis and documentation, staying stable at 20000 QPS peak
- Continuously optimized cross-team communication, cutting key-path latency from 1200ms to 180ms

Skills

Core skills: Spring AI / FastAPI services, Prompt engineering and evaluation, Milvus, Milvus vector database, Agent

Proficient in: Spring AI, Python, LLM, LLM observability and tracing, LangGraph/LangChain agent orchestration

Familiar with: LangGraph, MCP, Tool Orchestration, Observability, RAG retrieval and reranking, RAG

Self Evaluation

- Solid engineering fundamentals and strong troubleshooting skills, able to own a module end to end
- Business-minded, good at balancing technical design against delivery timelines
