

Chen Haoran

Gender: Male Objective: Machine Learning Engineer Location: Shenzhen

Phone: 13933873006 Email: chenhaoran3849@gmail.com GitHub: <https://github.com/chenhaoran666>

Education

2016.09 - 2020.06 Beijing University of Posts and Telecommunications Computer Science and Technology (M.S.)

Courses: Operating Systems, Data Structures and Algorithms, Computer Organization, Computer Networks, Design Patterns, Machine Learning

Summary

ML engineer focused on recommendation/search feature engineering and model iteration with serving and A/B evaluation.

Work Experience

2022.07 - Present Lalamove Machine Learning Engineer

- Collaborated with engineering to launch and monitor models, significantly lowering maintenance cost.
- Optimized feature store and realtime features, cutting end-to-end latency by 47%, ensuring online service stability.
- Owned feature engineering and model iteration for recommendation/search, lifting online CTR by 30%, recognized by stakeholders and peers.
- Adopted MLflow for experiment and model version management, supporting rapid business growth.

2020.07 - 2022.06 Baidu Junior Machine Learning Engineer

- Designed A/B experiments to evaluate strategies with metric dashboards, and key metrics improved steadily.
- Implemented deep models with PyTorch with steady offline metric gains, reused across multiple business lines.
- Built model training and serving pipelines for offline training and online inference, and key metrics improved steadily.

Projects

Recommendation Ranking Model (PyTorch + Feature Store)

- Trained a ranking model with PyTorch, lifting CTR by 30%, significantly lowering maintenance cost.
- Validated gains via A/B experiments.
- Integrated a feature store for realtime features, supporting rapid business growth.
- Designed feature engineering and sample construction, and related standards were adopted by the team.

Model Serving Platform (MLflow + Triton)

- Managed experiments and model versions with MLflow, and key metrics improved steadily.
- Served models for online inference.
- Supported gray release.
- Monitored model performance and drift, and it became a reusable team best practice.

Highlights

- Owned core modules that steadily served 8510K daily visits with 99.9%+ availability
- Established metrics and reviews around Recommendation/search systems to keep improving delivery quality
- Continuously optimized root-cause analysis and postmortems, cutting key-path latency from 2200ms to 320 ms
- Work around CI/CD pipelines delivered about 30% efficiency gains and was reused across the team
- Drove a focused effort on Feature engineering, reducing related issues by about 47%

Skills

Core skills: Feature Engineering, Model serving, MLflow, Recommendation

Proficient in: A/B experimentation, A/B Testing, Machine learning and deep learning, PyTorch

Familiar with: Python, Model Serving, PyTorch modeling, Machine Learning, Recommendation/search systems, Feature engineering

Self Evaluation

- Business-minded, good at balancing technical design against delivery timelines
- Solid engineering fundamentals and strong troubleshooting skills, able to own a module end to end
