

Cheng Siqi

Gender: Female Objective: Machine Learning Engineer Location: Beijing

Phone: 15707010955 Email: chengsiqi5789@outlook.com GitHub: <https://github.com/chengsiqi240>

## Education

2014.09 - 2018.06 Beijing Institute of Technology Network Engineering (M.S.)

Courses: Machine Learning, Software Engineering, Distributed Systems, Computer Organization, Data Structures and Algorithms, Design Patterns

## Summary

ML engineer focused on recommendation/search feature engineering and model iteration with serving and A/B evaluation.

## Work Experience

2020.07 - Present a SaaS company Machine Learning Engineer

- Built model training and serving pipelines for offline training and online inference, and related standards were adopted by the team.
- Designed A/B experiments to evaluate strategies with metric dashboards, and key metrics improved steadily.
- Optimized feature store and realtime features, cutting end-to-end latency by 48%.
- Owned feature engineering and model iteration for recommendation/search, lifting online CTR by 52%, improving end-to-end delivery quality.

2018.07 - 2020.06 Lalamove Junior Machine Learning Engineer

- Adopted MLflow for experiment and model version management, with experience documented and shared internally.
- Implemented deep models with PyTorch with steady offline metric gains.
- Collaborated with engineering to launch and monitor models, reused across multiple business lines.

## Projects

Model Serving Platform (MLflow + Triton)

- Supported gray release, significantly lowering maintenance cost.
- Monitored model performance and drift.
- Managed experiments and model versions with MLflow.
- Served models for online inference, reused across multiple business lines.

Recommendation Ranking Model (PyTorch + Feature Store)

- Designed feature engineering and sample construction, reused across multiple business lines.
- Integrated a feature store for realtime features.
- Validated gains via A/B experiments.
- Trained a ranking model with PyTorch, lifting CTR by 52%, supporting rapid business growth.

## Highlights

- Led a major technical effort involving A/B experimentation, staying stable at 8000 QPS peak

- Drove a focused effort on project management and planning, reducing related issues by about 48%
- Work around requirement analysis and documentation delivered about 52% efficiency gains and was reused across the team
- Owned core modules that steadily served 8430K daily visits with 99.9%+ availability
- Established metrics and reviews around data analysis and metrics to keep improving delivery quality

#### Skills

Core skills: Feature Engineering, Machine Learning, Recommendation, A/B experimentation

Proficient in: Model Serving, A/B Testing, Python, Recommendation/search systems

Familiar with: PyTorch, MLflow, Feature engineering, Model serving, PyTorch modeling, Machine learning and deep learning

#### Self Evaluation

- Enjoys retrospectives, cares about code quality and observability, and makes data-driven decisions
- Curious about new tech, continuously learning LLM and cloud-native topics and applying them in practice
