

Zheng Ting

Gender: Female Objective: DevOps / SRE Engineer Location: Xiamen

Phone: 17272311434 Email: zhengting6326@gmail.com GitHub: <https://github.com/zhengting393>

Education

2017.09 - 2021.06 Beijing University of Posts and Telecommunications Computer Science and Technology (M.S.)

Courses: Machine Learning, Computer Organization, Distributed Systems, Data Structures and Algorithms, Computer Networks, Operating Systems

Summary

DevOps/SRE engineer focused on Kubernetes stability, CI/CD and monitoring, skilled in incident handling and capacity planning.

Work Experience

2023.07 - Present a SaaS company DevOps Engineer

- Optimized image builds and artifact management, cutting build time significantly, recognized by stakeholders and peers.

- Handled incidents and capacity planning, reducing MTTR by 49%.

- Wrote automation scripts and an ops platform to cut manual work, improving end-to-end delivery quality.

- Built log collection (ELK/Loki) and distributed tracing, ensuring online service stability.

2021.07 - 2023.06 Xiaomi Junior DevOps Engineer

- Wrote Helm charts and CI/CD pipelines enabling blue-green and gray releases.

- Operated Kubernetes clusters and ensured stability across multiple production environments, reused across multiple business lines.

- Drove containerization and resource governance, raising cluster utilization by 34%.

Projects

Unified Monitoring & Alerting (Prometheus + Grafana + Alertmanager)

- Alert tiering and noise reduction via Alertmanager, and it became a reusable team best practice.

- Grafana dashboards and SLO management.

- Reduced MTTR by 49%.

- Collected multi-dimensional metrics with Prometheus.

Containerized Release Platform (Kubernetes + Helm + ArgoCD)

- Standardized releases with Kubernetes and Helm, supporting rapid business growth.

- Adopted ArgoCD for GitOps.

- Supported blue-green and gray releases, and key metrics improved steadily.

- Raised cluster utilization by 34%, reused across multiple business lines.

Highlights

- Drove a focused effort on computer networking basics, reducing related issues by about 49%

- Work around design patterns and refactoring delivered about 34% efficiency gains and was reused across

the team

- Continuously optimized CI/CD pipelines, cutting key-path latency from 1200ms to 320ms
- Built a reusable methodology and docs around RESTful API design, adopted by several teams
- Owned core modules that steadily served 4990K daily visits with 99.9%+ availability

Skills

Core skills: CI/CD, Helm, Python, SRE, Shell

Proficient in: Kubernetes, CI/CD pipelines, SRE reliability practices, Prometheus, Docker

Familiar with: Prometheus/Grafana, Kubernetes and container orchestration, Shell/Python scripting, Helm and GitOps, Grafana

Self Evaluation

- Stays calm under pressure and recovers services quickly during high-concurrency incidents
- Business-minded, good at balancing technical design against delivery timelines
