

Chen Fang

Gender: Female Objective: DevOps / SRE Engineer Location: Xiamen

Phone: 19738453500 Email: chenfang1589@163.com GitHub: <https://github.com/chenfang322>

Education

2015.09 - 2019.06 University of Electronic Science and Technology of China Data Science and Big Data Technology (M.S.)

Courses: Computer Organization, Operating Systems, Compilers, Design Patterns, Software Engineering, Computer Networks

GPA 3.5/4.0, top 15% in major; merit scholarship

Summary

DevOps/SRE engineer focused on Kubernetes stability, CI/CD and monitoring, skilled in incident handling and capacity planning.

Work Experience

2021.07 - Present a SaaS company DevOps Engineer

- Operated Kubernetes clusters and ensured stability across multiple production environments, ensuring online service stability.
- Built log collection (ELK/Loki) and distributed tracing, reused across multiple business lines.
- Wrote automation scripts and an ops platform to cut manual work, recognized by stakeholders and peers.
- Built Prometheus + Grafana monitoring and alerting with SLOs and error budgets, supporting rapid business growth.

2019.07 - 2021.06 Meituan Junior DevOps Engineer

- Optimized image builds and artifact management, cutting build time significantly, and related standards were adopted by the team.
- Drove containerization and resource governance, raising cluster utilization by 46%, ensuring online service stability.
- Handled incidents and capacity planning, reducing MTTR by 30%.

Projects

Unified Monitoring & Alerting (Prometheus + Grafana + Alertmanager)

- Alert tiering and noise reduction via Alertmanager, significantly lowering maintenance cost.
- Collected multi-dimensional metrics with Prometheus.
- Reduced MTTR by 30%.
- Grafana dashboards and SLO management, reused across multiple business lines.

Containerized Release Platform (Kubernetes + Helm + ArgoCD)

- Standardized releases with Kubernetes and Helm.
- Adopted ArgoCD for GitOps.
- Raised cluster utilization by 46%, and it became a reusable team best practice.
- Supported blue-green and gray releases, and key metrics improved steadily.

Highlights

- Drove a focused effort on CI/CD pipelines, reducing related issues by about 30%
- Owned core modules that steadily served 4360K daily visits with 99.9%+ availability
- Work around Helm and GitOps delivered about 46% efficiency gains and was reused across the team
- Established metrics and reviews around computer networking basics to keep improving delivery quality
- Continuously optimized root-cause analysis and postmortems, cutting key-path latency from 2200ms to 220ms

Skills

Core skills: SRE reliability practices, Kubernetes, Kubernetes and container orchestration, CI/CD pipelines, Prometheus

Proficient in: Prometheus/Grafana, Docker, Helm and GitOps, CI/CD, SRE

Familiar with: Helm, Grafana, Shell, Shell/Python scripting, Python

Self Evaluation

- Enjoys retrospectives, cares about code quality and observability, and makes data-driven decisions
- Business-minded, good at balancing technical design against delivery timelines
