

Zhu Ming

Gender: Male Objective: DevOps / SRE Engineer Location: Shanghai

Phone: 18759414477 Email: zhuming396@163.com GitHub: <https://github.com/zhuming787>

Education

2014.09 - 2018.06 Beijing University of Posts and Telecommunications Information Security (B.S.)

Courses: Computer Networks, Computer Organization, Database Systems, Machine Learning, Compilers, Data Structures and Algorithms

Summary

DevOps/SRE engineer focused on Kubernetes stability, CI/CD and monitoring, skilled in incident handling and capacity planning.

Work Experience

2020.07 - Present Trip.com DevOps Engineer

- Built log collection (ELK/Loki) and distributed tracing, recognized by stakeholders and peers.
- Handled incidents and capacity planning, reducing MTTR by 36%, supporting rapid business growth.
- Wrote automation scripts and an ops platform to cut manual work, improving end-to-end delivery quality.
- Operated Kubernetes clusters and ensured stability across multiple production environments, with experience documented and shared internally.

2018.07 - 2020.06 Didi Junior DevOps Engineer

- Wrote Helm charts and CI/CD pipelines enabling blue-green and gray releases.
- Optimized image builds and artifact management, cutting build time significantly.
- Drove containerization and resource governance, raising cluster utilization by 37%, with experience documented and shared internally.

Projects

Containerized Release Platform (Kubernetes + Helm + ArgoCD)

- Adopted ArgoCD for GitOps, ensuring online service stability.
- Raised cluster utilization by 37%.
- Supported blue-green and gray releases, supporting rapid business growth.
- Standardized releases with Kubernetes and Helm, with experience documented and shared internally.

Unified Monitoring & Alerting (Prometheus + Grafana + Alertmanager)

- Alert tiering and noise reduction via Alertmanager, with experience documented and shared internally.
- Reduced MTTR by 36%.
- Grafana dashboards and SLO management.
- Collected multi-dimensional metrics with Prometheus, and it became a reusable team best practice.

Highlights

- Owned core modules that steadily served 7980K daily visits with 99.9%+ availability
- Drove a focused effort on Prometheus/Grafana, reducing related issues by about 36%
- Led a major technical effort involving Kubernetes and container orchestration, staying stable at 12000

QPS peak

- Built a reusable methodology and docs around Linux and shell basics, adopted by several teams
- Work around Helm and GitOps delivered about 37% efficiency gains and was reused across the team

Skills

Core skills: Python, Helm, Shell, Prometheus/Grafana, Shell/Python scripting

Proficient in: CI/CD, SRE reliability practices, SRE, Prometheus, Docker

Familiar with: Grafana, CI/CD pipelines, Helm and GitOps, Kubernetes and container orchestration, Kubernetes

Self Evaluation

- Strong communication and collaboration with product, QA and ops to deliver projects on time
- Solid engineering fundamentals and strong troubleshooting skills, able to own a module end to end
