

Chen Yan

Gender: Female Objective: DevOps / SRE Engineer Location: Shenzhen

Phone: 13727421940 Email: chenyan7748@qq.com GitHub: <https://github.com/chenyan571>

Education

2017.09 - 2021.06 Dalian University of Technology Artificial Intelligence (M.S.)

Courses: Design Patterns, Operating Systems, Computer Networks, Database Systems, Machine Learning, Computer Organization

GPA 3.5/4.0, top 15% in major; merit scholarship

Summary

DevOps/SRE engineer focused on Kubernetes stability, CI/CD and monitoring, skilled in incident handling and capacity planning.

Work Experience

2023.07 - Present a SaaS company DevOps Engineer

- Wrote Helm charts and CI/CD pipelines enabling blue-green and gray releases, significantly lowering maintenance cost.
- Built Prometheus + Grafana monitoring and alerting with SLOs and error budgets, and related standards were adopted by the team.
- Built log collection (ELK/Loki) and distributed tracing, improving end-to-end delivery quality.
- Optimized image builds and artifact management, cutting build time significantly, and it became a reusable team best practice.

2021.07 - 2023.06 Baidu Junior DevOps Engineer

- Handled incidents and capacity planning, reducing MTTR by 20%, and key metrics improved steadily.
- Wrote automation scripts and an ops platform to cut manual work, recognized by stakeholders and peers.
- Drove containerization and resource governance, raising cluster utilization by 56%, and related standards were adopted by the team.

Projects

Unified Monitoring & Alerting (Prometheus + Grafana + Alertmanager)

- Alert tiering and noise reduction via Alertmanager.
- Reduced MTTR by 20%, significantly lowering maintenance cost.
- Grafana dashboards and SLO management, significantly lowering maintenance cost.
- Collected multi-dimensional metrics with Prometheus, significantly lowering maintenance cost.

Containerized Release Platform (Kubernetes + Helm + ArgoCD)

- Raised cluster utilization by 56%, improving end-to-end delivery quality.
- Adopted ArgoCD for GitOps, reused across multiple business lines.
- Standardized releases with Kubernetes and Helm.
- Supported blue-green and gray releases.

Highlights

- Established metrics and reviews around CI/CD pipelines to keep improving delivery quality
- Owned core modules that steadily served 1630K daily visits with 99.9%+ availability
- Led a major technical effort involving Git collaboration and code review, staying stable at 12000 QPS peak
- Work around Prometheus/Grafana delivered about 56% efficiency gains and was reused across the team
- Built a reusable methodology and docs around Shell/Python scripting, adopted by several teams

Skills

Core skills: Helm and GitOps, Kubernetes and container orchestration, Shell, Kubernetes, Docker

Proficient in: SRE, CI/CD pipelines, Python, Shell/Python scripting, Helm

Familiar with: CI/CD, Grafana, SRE reliability practices, Prometheus, Prometheus/Grafana

Self Evaluation

- Solid engineering fundamentals and strong troubleshooting skills, able to own a module end to end
- Business-minded, good at balancing technical design against delivery timelines
