

Guo Jie

Gender: Male Objective: Junior Frontend Engineer Location: Suzhou

Phone: 15213170195 Email: guojie6575@foxmail.com GitHub: <https://github.com/guojie988>

Education

2019.09 - 2023.06 Huazhong University of Science and Technology Data Science and Big Data Technology (B.S.)

Courses: Database Systems, Operating Systems, Computer Organization, Distributed Systems, Machine Learning, Computer Networks

Summary

1.5 years of frontend experience focused on Vue admin dashboards, component reuse and interaction details

Work Experience

2024.03 - Present Xiaohongshu Frontend Engineer

- Implemented permission routing and multi-theme switching with dark mode and i18n, improving end-to-end delivery quality.
- Implemented complex ECharts visualizations with smooth interaction over large datasets, reused across multiple business lines.
- Built admin and dashboard frontends including candidate list, report detail, trace timeline and feedback pages.
- Drove engineering migration to Vite, significantly speeding up local startup and builds.

2023.06 - 2023.12 Ant Group Intern Frontend Engineer

- Optimized first-screen load and long-list rendering with virtual scrolling and lazy loading, cutting first-screen time by 46%, with experience documented and shared internally.
- Wrote unit and end-to-end tests to keep core interactions stable, ensuring online service stability.
- Split a micro-frontend and onboarded sub-apps to reduce cross-team coupling, and it became a reusable team best practice.

Projects

Resume Evaluation Platform Frontend (Vue3 + TypeScript + Vite + Pinia)

- Optimized first-screen and long-list rendering for smoother interaction, and key metrics improved steadily.
- Added tracking and frontend monitoring.
- Built a reusable component library and scaffolding, and key metrics improved steadily.
- Built candidate list, report detail and trace timeline pages.

Realtime Data Visualization Dashboard (Vue3 + ECharts + WebSocket)

- Rendered complex charts over large datasets while staying smooth, and related standards were adopted by the team.
- Supported theme switching and dark mode, improving end-to-end delivery quality.
- Optimized repaint and memory usage, with experience documented and shared internally.

- Implemented live updates over WebSocket, significantly lowering maintenance cost.

Component Library & Design System (Vue3 + Storybook)

- Documented components with Storybook, recognized by stakeholders and peers.
- Unified interaction and style specs.
- Improved reuse across teams, and key metrics improved steadily.
- Added unit and e2e tests.

Highlights

- Continuously optimized RESTful API design, cutting key-path latency from 2200ms to 380ms
- Built a reusable methodology and docs around Linux and shell basics, adopted by several teams
- Owned core modules that steadily served 1840K daily visits with 99.9%+ availability
- Work around ECharts data visualization delivered about 46% efficiency gains and was reused across the team
- Led a major technical effort involving project management and planning, staying stable at 30000 QPS peak

Skills

Core skills: Vue3, Frontend performance optimization, Vue3 and Composition API, ECharts data visualization

Proficient in: TypeScript and tooling, Pinia, Vite, ECharts

Familiar with: Componentization, HTTP, TypeScript, CSS, Vite/Webpack builds, React and micro-frontends

Self Evaluation

- Business-minded, good at balancing technical design against delivery timelines
- Enjoys retrospectives, cares about code quality and observability, and makes data-driven decisions
