

Lin Haoran

Gender: Male Objective: Junior Frontend Engineer Location: Suzhou

Phone: 13627879025 Email: linhaoran1606@foxmail.com GitHub: <https://github.com/linhaoran705>

Education

2019.09 - 2023.06 Sichuan University Electronic Information Engineering (B.S.)

Courses: Distributed Systems, Data Structures and Algorithms, Database Systems, Operating Systems, Design Patterns, Computer Networks

GPA 3.9/4.0, top 5% in major; merit scholarship

Summary

1.5 years of frontend experience focused on Vue admin dashboards, component reuse and interaction details

Work Experience

2024.03 - Present Beike Frontend Engineer

- Built a shared component library and scaffolding, unifying interaction and style specs and raising reuse to 16%, recognized by stakeholders and peers.
- Optimized first-screen load and long-list rendering with virtual scrolling and lazy loading, cutting first-screen time by 29%, and it became a reusable team best practice.
- Defined API contracts with backend and wrapped a unified request layer and error handling.
- Split a micro-frontend and onboarded sub-apps to reduce cross-team coupling, significantly lowering maintenance cost.

2023.06 - 2023.12 Xiaomi Intern Frontend Engineer

- Drove engineering migration to Vite, significantly speeding up local startup and builds.
- Built admin and dashboard frontends including candidate list, report detail, trace timeline and feedback pages, and it became a reusable team best practice.
- Implemented permission routing and multi-theme switching with dark mode and i18n, supporting rapid business growth.

Projects

Resume Evaluation Platform Frontend (Vue3 + TypeScript + Vite + Pinia)

- Built candidate list, report detail and trace timeline pages, and key metrics improved steadily.
- Added tracking and frontend monitoring.
- Built a reusable component library and scaffolding, ensuring online service stability.
- Optimized first-screen and long-list rendering for smoother interaction.

Component Library & Design System (Vue3 + Storybook)

- Added unit and e2e tests, and key metrics improved steadily.
- Documented components with Storybook, reused across multiple business lines.
- Improved reuse across teams.
- Unified interaction and style specs, improving end-to-end delivery quality.

Realtime Data Visualization Dashboard (Vue3 + ECharts + WebSocket)

- Optimized repaint and memory usage, ensuring online service stability.
- Rendered complex charts over large datasets while staying smooth, improving end-to-end delivery quality
- .
- Supported theme switching and dark mode.
- Implemented live updates over WebSocket.

Highlights

- Built a reusable methodology and docs around Vue3 and Composition API, adopted by several teams
- Work around ECharts data visualization delivered about 29% efficiency gains and was reused across the team
- Continuously optimized Vite/Webpack builds, cutting key-path latency from 2600ms to 420ms
- Established metrics and reviews around Git collaboration and code review to keep improving delivery quality
- Owned core modules that steadily served 4490K daily visits with 99.9%+ availability

Skills

Core skills: Frontend performance optimization, TypeScript, Vue3, CSS

Proficient in: Pinia, HTTP, ECharts data visualization, Vite

Familiar with: Vite/Webpack builds, TypeScript and tooling, Vue3 and Composition API, ECharts, Componentization, React and micro-frontends

Self Evaluation

- Business-minded, good at balancing technical design against delivery timelines
- Solid engineering fundamentals and strong troubleshooting skills, able to own a module end to end
