

Chen Jiahao

Gender: Male Objective: Android Engineer Location: Shanghai

Phone: 17018605035 Email: chenjiahao215@gmail.com

Education

2016.09 - 2020.06 Zhejiang University Communication Engineering (M.S.)

Courses: Compilers, Data Structures and Algorithms, Machine Learning, Computer Organization, Operating Systems, Database Systems

Summary

Android engineer focused on architecture evolution, startup/crash governance and componentization.

Work Experience

2022.07 - Present NetEase Android Engineer

- Refactored pages with Jetpack components for maintainability, supporting rapid business growth.
- Built device monitoring and gray-release capabilities, and it became a reusable team best practice.
- Improved weak-network experience with backend.
- Optimized startup, reducing cold-start from 1800ms to 180ms, reused across multiple business lines.

2020.07 - 2022.06 Lalamove Junior Android Engineer

- Governed crashes and ANRs, reducing crash rate by 51%, and related standards were adopted by the team.
- Integrated payment and media SDKs while keeping core paths stable, reused across multiple business lines.
- Owned Android client development and architecture evolution with componentization, and key metrics improved steadily.

Projects

E-commerce Android App (Kotlin + Jetpack)

- Optimized startup and memory, significantly lowering maintenance cost.
- Built with Kotlin and Jetpack, and key metrics improved steadily.
- Decoupled via componentized architecture.
- Reduced crash rate by 51%.

Componentization & Plugin Framework (Android)

- Unified base libraries and conventions.
- Designed module routing and communication.
- Supported dynamic loading and hotfix, significantly lowering maintenance cost.
- Improved team collaboration, improving end-to-end delivery quality.

Highlights

- Led a major technical effort involving data analysis and metrics, staying stable at 3000 QPS peak
- Continuously optimized Git collaboration and code review, cutting key-path latency from 1800ms to 180ms
- Built a reusable methodology and docs around RESTful API design, adopted by several teams
- Drove a focused effort on cross-team communication, reducing related issues by about 49%

- Established metrics and reviews around Android and Kotlin to keep improving delivery quality

Skills

Core skills: Componentization and plugins, Performance, Jetpack, Performance and crash governance

Proficient in: Payment SDK, Android, Android and Kotlin, Device monitoring and gray release

Familiar with: Kotlin, Componentization, Jetpack components, Crash Governance, Media/payment SDKs

Self Evaluation

- Business-minded, good at balancing technical design against delivery timelines
- Enjoys retrospectives, cares about code quality and observability, and makes data-driven decisions
