

Song Fang

Gender: Female Objective: AI Product Manager Location: Shanghai

Phone: 19857547388 Email: songfang8880@gmail.com GitHub: <https://github.com/songfang290>

Education

2014.09 - 2018.06 Sichuan University Software Engineering (M.S.)

Courses: Software Engineering, Database Systems, Computer Networks, Data Structures and Algorithms, Compilers, Operating Systems

Summary

Six years of product experience in B2B workflow products and LLM features, skilled in data-driven iteration and cross-team delivery.

Work Experience

2020.07 - Present Zhihu Product Manager

- Mined pain points via user interviews and data analysis and shaped the roadmap, reused across multiple business lines.
- Defined core metrics: time-to-screen, recommendation acceptance, manual override and evidence coverage, and key metrics improved steadily.
- Owned end-to-end design of an AI resume-screening product from upload to HR feedback.
- Drove monetization and pricing, growing quarterly revenue by 46%.

2018.07 - 2020.06 Ant Group Junior Product Manager

- Owned competitive analysis and market research with a differentiation strategy, improving end-to-end delivery quality.
- Designed an LLM report-quality feedback system and evaluation dashboard to lift generation quality, and key metrics improved steadily.
- Led requirement reviews and PRDs, coordinating engineering, data and CS teams for enterprise rollout, supporting rapid business growth.

Projects

LLM Report Quality Evaluation System (LLM Evaluation)

- Improved generated report quality.
- Designed a feedback taxonomy, and it became a reusable team best practice.
- Built an evaluation dashboard.
- Closed the quality-improvement loop.

AI Resume Screening Workflow (B2B SaaS)

- Defined core metrics and dashboards, and related standards were adopted by the team.
- Drove enterprise customer rollout.
- Designed the end-to-end flow from upload to feedback.
- Coordinated engineering, data and CS teams, recognized by stakeholders and peers.

Recruiting Data Analytics Platform (Analytics)

- Defined funnel and conversion metrics.

- Delivered insights to support decisions, supporting rapid business growth.
- Shaped the product roadmap.
- Designed A/B experiments.

Highlights

- Owned core modules that steadily served 2130K daily visits with 99.9%+ availability
- Led a major technical effort involving unit testing and quality, staying stable at 12000 QPS peak
- Work around Requirement analysis and PRD writing delivered about 31% efficiency gains and was reused across the team
- Established metrics and reviews around design patterns and refactoring to keep improving delivery quality
- Continuously optimized Linux and shell basics, cutting key-path latency from 1500ms to 180ms

Skills

Core skills: A/B Testing, User Research, Monetization, Requirement Analysis

Proficient in: Data analysis and metric systems, Project Management, Requirement analysis and PRD writing, LLM Application

Familiar with: Basic SQL for data pulls, LLM application boundaries, Project management and cross-team collaboration, A/B experiment design, PRD, Data Analysis

Self Evaluation

- Strong communication and collaboration with product, QA and ops to deliver projects on time
- Business-minded, good at balancing technical design against delivery timelines
