

Ma Ming

Gender: Male Objective: AI Product Manager Location: Xiamen

Phone: 18594791099 Email: maming9568@foxmail.com GitHub: <https://github.com/maming859>

Education

2014.09 - 2018.06 Xidian University Communication Engineering (M.S.)

Courses: Data Structures and Algorithms, Computer Organization, Software Engineering, Distributed Systems, Operating Systems, Compilers

Summary

Six years of product experience in B2B workflow products and LLM features, skilled in data-driven iteration and cross-team delivery.

Work Experience

2020.07 - Present Kuaishou Product Manager

- Owned end-to-end design of an AI resume-screening product from upload to HR feedback.
- Designed an LLM report-quality feedback system and evaluation dashboard to lift generation quality, supporting rapid business growth.
- Ran A/B experiments validating key features, lifting core conversion by 60%.
- Drove monetization and pricing, growing quarterly revenue by 28%, and related standards were adopted by the team.

2018.07 - 2020.06 NetEase Junior Product Manager

- Defined core metrics: time-to-screen, recommendation acceptance, manual override and evidence coverage.
- Mined pain points via user interviews and data analysis and shaped the roadmap.
- Led requirement reviews and PRDs, coordinating engineering, data and CS teams for enterprise rollout, and related standards were adopted by the team.

Projects

LLM Report Quality Evaluation System (LLM Evaluation)

- Built an evaluation dashboard, improving end-to-end delivery quality.
- Designed a feedback taxonomy.
- Improved generated report quality.
- Closed the quality-improvement loop, and key metrics improved steadily.

Recruiting Data Analytics Platform (Analytics)

- Defined funnel and conversion metrics, and related standards were adopted by the team.
- Delivered insights to support decisions, and it became a reusable team best practice.
- Designed A/B experiments.
- Shaped the product roadmap.

AI Resume Screening Workflow (B2B SaaS)

- Defined core metrics and dashboards, supporting rapid business growth.
- Designed the end-to-end flow from upload to feedback.
- Coordinated engineering, data and CS teams.

- Drove enterprise customer rollout.

Highlights

- Drove a focused effort on requirement analysis and documentation, reducing related issues by about 28%
- Built a reusable methodology and docs around Linux and shell basics, adopted by several teams
- Owned core modules that steadily served 3390K daily visits with 99.9%+ availability
- Established metrics and reviews around computer networking basics to keep improving delivery quality
- Led a major technical effort involving cross-team communication, staying stable at 20000 QPS peak

Skills

Core skills: Requirement Analysis, Project management and cross-team collaboration, PRD, Requirement analysis and PRD writing

Proficient in: LLM Application, User Research, A/B Testing, Data analysis and metric systems

Familiar with: Data Analysis, A/B experiment design, LLM application boundaries, Basic SQL for data pulls, Monetization, Project Management

Self Evaluation

- Solid engineering fundamentals and strong troubleshooting skills, able to own a module end to end
- Curious about new tech, continuously learning LLM and cloud-native topics and applying them in practice
