

He Mengyao

Gender: Female Objective: AI Product Manager Location: Suzhou

Phone: 13530945875 Email: hemengyao5662@foxmail.com GitHub: <https://github.com/hemengyao61>

Education

2017.09 - 2021.06 Shandong University Computer Science and Technology (M.S.)

Courses: Operating Systems, Machine Learning, Distributed Systems, Computer Organization, Computer Networks, Compilers

GPA 3.8/4.0, top 15% in major; merit scholarship

Summary

Six years of product experience in B2B workflow products and LLM features, skilled in data-driven iteration and cross-team delivery.

Work Experience

2023.07 - Present Xiaomi Product Manager

- Designed an LLM report-quality feedback system and evaluation dashboard to lift generation quality, recognized by stakeholders and peers.
- Owned competitive analysis and market research with a differentiation strategy.
- Ran A/B experiments validating key features, lifting core conversion by 52%, with experience documented and shared internally.
- Owned end-to-end design of an AI resume-screening product from upload to HR feedback, recognized by stakeholders and peers.

2021.07 - 2023.06 Trip.com Junior Product Manager

- Mined pain points via user interviews and data analysis and shaped the roadmap, recognized by stakeholders and peers.
- Led requirement reviews and PRDs, coordinating engineering, data and CS teams for enterprise rollout, ensuring online service stability.
- Defined core metrics: time-to-screen, recommendation acceptance, manual override and evidence coverage.

Projects

AI Resume Screening Workflow (B2B SaaS)

- Coordinated engineering, data and CS teams.
- Drove enterprise customer rollout.
- Designed the end-to-end flow from upload to feedback, recognized by stakeholders and peers.
- Defined core metrics and dashboards, and it became a reusable team best practice.

Recruiting Data Analytics Platform (Analytics)

- Delivered insights to support decisions.
- Defined funnel and conversion metrics, significantly lowering maintenance cost.
- Shaped the product roadmap.
- Designed A/B experiments.

LLM Report Quality Evaluation System (LLM Evaluation)

- Closed the quality-improvement loop, significantly lowering maintenance cost.
- Designed a feedback taxonomy.
- Improved generated report quality.
- Built an evaluation dashboard.

Highlights

- Continuously optimized root-cause analysis and postmortems, cutting key-path latency from 1500ms to 320 ms
- Drove a focused effort on Basic SQL for data pulls, reducing related issues by about 26%
- Established metrics and reviews around RESTful API design to keep improving delivery quality
- Owned core modules that steadily served 2800K daily visits with 99.9%+ availability
- Built a reusable methodology and docs around design patterns and refactoring, adopted by several teams

Skills

Core skills: Monetization, Basic SQL for data pulls, LLM Application, PRD

Proficient in: Data analysis and metric systems, Data Analysis, LLM application boundaries, Project management and cross-team collaboration

Familiar with: A/B experiment design, Requirement Analysis, A/B Testing, Project Management, Requirement analysis and PRD writing, User Research

Self Evaluation

- Enjoys retrospectives, cares about code quality and observability, and makes data-driven decisions
- Stays calm under pressure and recovers services quickly during high-concurrency incidents
