

Hu Qiang

Gender: Male Objective: AI Product Manager Location: Xian

Phone: 18609673725 Email: huqiang901@gmail.com GitHub: <https://github.com/huqiang588>

Education

2016.09 - 2020.06 Nanjing University Artificial Intelligence (M.S.)

Courses: Software Engineering, Data Structures and Algorithms, Distributed Systems, Computer Organization, Database Systems, Machine Learning

Summary

Six years of product experience in B2B workflow products and LLM features, skilled in data-driven iteration and cross-team delivery.

Work Experience

2022.07 - Present a fintech company Product Manager

- Mined pain points via user interviews and data analysis and shaped the roadmap, supporting rapid business growth.
- Designed an LLM report-quality feedback system and evaluation dashboard to lift generation quality, and it became a reusable team best practice.
- Led requirement reviews and PRDs, coordinating engineering, data and CS teams for enterprise rollout, supporting rapid business growth.
- Owned end-to-end design of an AI resume-screening product from upload to HR feedback, and key metrics improved steadily.

2020.07 - 2022.06 Pinduoduo Junior Product Manager

- Owned competitive analysis and market research with a differentiation strategy, and it became a reusable team best practice.
- Ran A/B experiments validating key features, lifting core conversion by 35%, with experience documented and shared internally.
- Drove monetization and pricing, growing quarterly revenue by 25%.

Projects

Recruiting Data Analytics Platform (Analytics)

- Designed A/B experiments.
- Delivered insights to support decisions, with experience documented and shared internally.
- Shaped the product roadmap, significantly lowering maintenance cost.
- Defined funnel and conversion metrics.

LLM Report Quality Evaluation System (LLM Evaluation)

- Designed a feedback taxonomy, supporting rapid business growth.
- Improved generated report quality.
- Built an evaluation dashboard.
- Closed the quality-improvement loop.

AI Resume Screening Workflow (B2B SaaS)

- Drove enterprise customer rollout, supporting rapid business growth.
- Designed the end-to-end flow from upload to feedback.
- Defined core metrics and dashboards, improving end-to-end delivery quality.
- Coordinated engineering, data and CS teams, and it became a reusable team best practice.

Highlights

- Owned core modules that steadily served 4000K daily visits with 99.9%+ availability
- Continuously optimized Project management and cross-team collaboration, cutting key-path latency from 900ms to 420ms
- Established metrics and reviews around cross-team communication to keep improving delivery quality
- Led a major technical effort involving Linux and shell basics, staying stable at 20000 QPS peak
- Drove a focused effort on CI/CD pipelines, reducing related issues by about 25%

Skills

Core skills: Requirement Analysis, A/B Testing, Data Analysis, Requirement analysis and PRD writing

Proficient in: Basic SQL for data pulls, User Research, LLM Application, Monetization

Familiar with: PRD, Data analysis and metric systems, Project Management, Project management and cross-team collaboration, A/B experiment design, LLM application boundaries

Self Evaluation

- Stays calm under pressure and recovers services quickly during high-concurrency incidents
- Curious about new tech, continuously learning LLM and cloud-native topics and applying them in practice
