

Han Siyuan

Gender: Male Objective: QA Automation Engineer Location: Xiamen

Phone: 15468060656 Email: hansiyuan2372@gmail.com

Education

2017.09 - 2021.06 Hunan University Computer Science and Technology (M.S.)

Courses: Compilers, Computer Networks, Design Patterns, Distributed Systems, Machine Learning, Operating Systems

Summary

QA automation engineer focused on test frameworks, API/performance testing and quality metrics, shifting quality left into the pipeline.

Work Experience

2023.07 - Present Zhihu QA Automation Engineer

- Integrated CI/CD for test-on-commit to surface defects early.
- Built load-testing, located bottlenecks and raised API throughput by 34%, and related standards were adopted by the team.
- Delivered quality dashboards quantifying coverage and defect distribution, significantly lowering maintenance cost.
- Designed test data and a mock platform to cut integration cost.

2021.07 - 2023.06 Bilibili Junior QA Automation Engineer

- Wrote automation with Pytest/Selenium, improving regression efficiency by 51%.
- Drove quality gates and release checkpoints, reducing production defects, and related standards were adopted by the team.
- Built API and UI test-automation frameworks covering core regression, and related standards were adopted by the team.

Projects

Test Automation Platform (Pytest + Selenium + Allure)

- Wired CI for test-on-commit, and related standards were adopted by the team.
- Built a framework with Pytest and Selenium, ensuring online service stability.
- Integrated Allure reporting, improving end-to-end delivery quality.
- Improved regression efficiency by 51%, and key metrics improved steadily.

Full-Link Load Testing (JMeter + Grafana)

- Monitored key metrics with Grafana.
- Located performance bottlenecks, and key metrics improved steadily.
- Designed load scenarios with JMeter, supporting rapid business growth.
- Raised API throughput by 34%.

Highlights

- Led a major technical effort involving computer networking basics, staying stable at 12000 QPS peak

- Built a reusable methodology and docs around API and performance testing, adopted by several teams
- Work around Test data and mocking delivered about 51% efficiency gains and was reused across the team
- Owned core modules that steadily served 5460K daily visits with 99.9%+ availability
- Continuously optimized data analysis and metrics, cutting key-path latency from 1800ms to 220ms

Skills

Core skills: Python, Pytest/Selenium, Test data and mocking, Quality metric systems

Proficient in: Performance Testing, CI/CD, Test Development, API Testing

Familiar with: Pytest, Quality Assurance, CI/CD integration, API and performance testing, Test automation frameworks, Selenium

Self Evaluation

- Business-minded, good at balancing technical design against delivery timelines
- Stays calm under pressure and recovers services quickly during high-concurrency incidents
