

Luo Chao

Gender: Male Objective: Senior Frontend Engineer Location: Shanghai

Phone: 13026939553 Email: luochao808@163.com

## Education

2013.09 - 2017.06 University of Electronic Science and Technology of China Electronic Information Engineering (B.S.)

Courses: Software Engineering, Data Structures and Algorithms, Compilers, Machine Learning, Operating Systems, Database Systems

## Summary

Senior frontend engineer skilled in complex dashboards, visualization, performance optimization and tooling, having led micro-frontend splits.

## Work Experience

2020.07 - Present Kuaishou Senior Frontend Engineer

- Built a shared component library and scaffolding, unifying interaction and style specs and raising reuse to 23%, reused across multiple business lines.
- Split a micro-frontend and onboarded sub-apps to reduce cross-team coupling, recognized by stakeholders and peers.
- Added tracking and frontend monitoring for blank screen, JS errors and API latency with a quality dashboard.
- Drove engineering migration to Vite, significantly speeding up local startup and builds, and key metrics improved steadily.
- Defined API contracts with backend and wrapped a unified request layer and error handling, ensuring online service stability.

2017.07 - 2020.06 ByteDance Frontend Engineer

- Optimized first-screen load and long-list rendering with virtual scrolling and lazy loading, cutting first-screen time by 59%, with experience documented and shared internally.
- Wrote unit and end-to-end tests to keep core interactions stable, ensuring online service stability.
- Implemented complex ECharts visualizations with smooth interaction over large datasets, and related standards were adopted by the team.
- Built admin and dashboard frontends including candidate list, report detail, trace timeline and feedback pages, reused across multiple business lines.

## Projects

Resume Evaluation Platform Frontend (Vue3 + TypeScript + Vite + Pinia)

- Optimized first-screen and long-list rendering for smoother interaction.
- Built a reusable component library and scaffolding, significantly lowering maintenance cost.
- Added tracking and frontend monitoring, significantly lowering maintenance cost.
- Built candidate list, report detail and trace timeline pages.

Component Library & Design System (Vue3 + Storybook)

- Improved reuse across teams, recognized by stakeholders and peers.
- Unified interaction and style specs.
- Added unit and e2e tests.
- Documented components with Storybook, recognized by stakeholders and peers.

#### Realtime Data Visualization Dashboard (Vue3 + ECharts + WebSocket)

- Optimized repaint and memory usage, and it became a reusable team best practice.
- Implemented live updates over WebSocket.
- Supported theme switching and dark mode, ensuring online service stability.
- Rendered complex charts over large datasets while staying smooth.

#### Highlights

- Established metrics and reviews around Git collaboration and code review to keep improving delivery quality
- Drove a focused effort on requirement analysis and documentation, reducing related issues by about 23%
- Owned core modules that steadily served 2430K daily visits with 99.9%+ availability
- Built a reusable methodology and docs around ECharts data visualization, adopted by several teams
- Work around project management and planning delivered about 59% efficiency gains and was reused across the team

#### Skills

Core skills: Performance, TypeScript, Vite, ECharts data visualization, Vue3

Proficient in: Visualization, Node.js, Vue3 and Composition API, React and micro-frontends, TypeScript and tooling

Familiar with: Frontend performance optimization, Webpack, Engineering, Micro-frontend, React, Vite/Webpack builds

#### Self Evaluation

- Solid engineering fundamentals and strong troubleshooting skills, able to own a module end to end
- Strong communication and collaboration with product, QA and ops to deliver projects on time
