

Zhang Ming

Gender: Male Objective: Senior Frontend Engineer Location: Beijing

Phone: 17741208180 Email: zhangming7150@163.com

Education

2013.09 - 2017.06 South China University of Technology Communication Engineering (M.S.)

Courses: Operating Systems, Distributed Systems, Data Structures and Algorithms, Design Patterns, Database Systems, Computer Organization

GPA 3.8/4.0, top 20% in major; merit scholarship

Summary

Senior frontend engineer skilled in complex dashboards, visualization, performance optimization and tooling, having led micro-frontend splits.

Work Experience

2020.07 - Present a SaaS company Senior Frontend Engineer

- Drove engineering migration to Vite, significantly speeding up local startup and builds, with experience documented and shared internally.
- Split a micro-frontend and onboarded sub-apps to reduce cross-team coupling.
- Implemented complex ECharts visualizations with smooth interaction over large datasets, and related standards were adopted by the team.
- Added tracking and frontend monitoring for blank screen, JS errors and API latency with a quality dashboard, supporting rapid business growth.
- Optimized first-screen load and long-list rendering with virtual scrolling and lazy loading, cutting first-screen time by 58%, improving end-to-end delivery quality.

2017.07 - 2020.06 Pinduoduo Frontend Engineer

- Built a shared component library and scaffolding, unifying interaction and style specs and raising reuse to 28%, ensuring online service stability.
- Built admin and dashboard frontends including candidate list, report detail, trace timeline and feedback pages, reused across multiple business lines.
- Defined API contracts with backend and wrapped a unified request layer and error handling, significantly lowering maintenance cost.
- Implemented permission routing and multi-theme switching with dark mode and i18n, ensuring online service stability.

Projects

Realtime Data Visualization Dashboard (Vue3 + ECharts + WebSocket)

- Optimized repaint and memory usage, improving end-to-end delivery quality.
- Implemented live updates over WebSocket, ensuring online service stability.
- Rendered complex charts over large datasets while staying smooth, recognized by stakeholders and peers.
- Supported theme switching and dark mode.

Component Library & Design System (Vue3 + Storybook)

- Unified interaction and style specs.
- Improved reuse across teams.
- Added unit and e2e tests, improving end-to-end delivery quality.
- Documented components with Storybook.

Resume Evaluation Platform Frontend (Vue3 + TypeScript + Vite + Pinia)

- Built candidate list, report detail and trace timeline pages, and related standards were adopted by the team.
- Added tracking and frontend monitoring, and key metrics improved steadily.
- Built a reusable component library and scaffolding, reused across multiple business lines.
- Optimized first-screen and long-list rendering for smoother interaction, and key metrics improved steadily.

Highlights

- Owned core modules that steadily served 4140K daily visits with 99.9%+ availability
- Continuously optimized computer networking basics, cutting key-path latency from 2200ms to 420ms
- Established metrics and reviews around RESTful API design to keep improving delivery quality
- Led a major technical effort involving project management and planning, staying stable at 5000 QPS peak
- Work around Linux and shell basics delivered about 58% efficiency gains and was reused across the team

Skills

Core skills: Engineering, Frontend performance optimization, Webpack, Node.js, Vue3 and Composition API
 Proficient in: Visualization, Micro-frontend, ECharts data visualization, TypeScript, React and micro-frontends

Familiar with: Vue3, React, Vite/Webpack builds, Performance, TypeScript and tooling, Vite

Self Evaluation

- Curious about new tech, continuously learning LLM and cloud-native topics and applying them in practice
- Stays calm under pressure and recovers services quickly during high-concurrency incidents
