

Xu Wenbo

Gender: Male Objective: Senior Frontend Engineer Location: Beijing

Phone: 15856162714 Email: xuwenbo3105@gmail.com GitHub: <https://github.com/xuwenbo286>

Education

2011.09 - 2015.06 Shanghai Jiao Tong University Electronic Information Engineering (B.S.)

Courses: Computer Networks, Operating Systems, Computer Organization, Software Engineering, Machine Learning, Data Structures and Algorithms

GPA 3.4/4.0, top 20% in major; merit scholarship

Summary

Senior frontend engineer skilled in complex dashboards, visualization, performance optimization and tooling, having led micro-frontend splits.

Work Experience

2018.07 - Present NIO Senior Frontend Engineer

- Built a shared component library and scaffolding, unifying interaction and style specs and raising reuse to 46%, supporting rapid business growth.
- Implemented permission routing and multi-theme switching with dark mode and i18n, and related standards were adopted by the team.
- Defined API contracts with backend and wrapped a unified request layer and error handling, significantly lowering maintenance cost.
- Drove engineering migration to Vite, significantly speeding up local startup and builds.
- Wrote unit and end-to-end tests to keep core interactions stable, recognized by stakeholders and peers.

2015.07 - 2018.06 Kuaishou Frontend Engineer

- Split a micro-frontend and onboarded sub-apps to reduce cross-team coupling, and related standards were adopted by the team.
- Optimized first-screen load and long-list rendering with virtual scrolling and lazy loading, cutting first-screen time by 31%, with experience documented and shared internally.
- Added tracking and frontend monitoring for blank screen, JS errors and API latency with a quality dashboard, and related standards were adopted by the team.
- Implemented complex ECharts visualizations with smooth interaction over large datasets, with experience documented and shared internally.

Projects

Component Library & Design System (Vue3 + Storybook)

- Added unit and e2e tests, and related standards were adopted by the team.
- Unified interaction and style specs.
- Documented components with Storybook, ensuring online service stability.
- Improved reuse across teams, and it became a reusable team best practice.

Resume Evaluation Platform Frontend (Vue3 + TypeScript + Vite + Pinia)

- Added tracking and frontend monitoring, and related standards were adopted by the team.

- Built a reusable component library and scaffolding.
- Built candidate list, report detail and trace timeline pages, improving end-to-end delivery quality.
- Optimized first-screen and long-list rendering for smoother interaction, and key metrics improved steadily.

Realtime Data Visualization Dashboard (Vue3 + ECharts + WebSocket)

- Optimized repaint and memory usage.
- Supported theme switching and dark mode, with experience documented and shared internally.
- Rendered complex charts over large datasets while staying smooth.
- Implemented live updates over WebSocket.

Highlights

- Owned core modules that steadily served 2430K daily visits with 99.9%+ availability
- Drove a focused effort on Git collaboration and code review, reducing related issues by about 46%
- Built a reusable methodology and docs around data analysis and metrics, adopted by several teams
- Established metrics and reviews around project management and planning to keep improving delivery quality
- Led a major technical effort involving React and micro-frontends, staying stable at 12000 QPS peak

Skills

Core skills: Vue3 and Composition API, Performance, Engineering, TypeScript, Node.js

Proficient in: React and micro-frontends, ECharts data visualization, TypeScript and tooling, Micro-front end, Vite/Webpack builds

Familiar with: Visualization, Frontend performance optimization, Vue3, Webpack, React, Vite

Self Evaluation

- Solid engineering fundamentals and strong troubleshooting skills, able to own a module end to end
- Enjoys retrospectives, cares about code quality and observability, and makes data-driven decisions
